SKILLS

JavaScript, Python, React, Redux, Node.js, Express.js, Flask, SQL, Git, HTML, CSS, SQLite3, Sequelize, AWS, Heroku, Docker

PROJECTS

Chipette (JavaScript, React, Redux, Node.js, Express.js, Sequelize, SQLite3, Heroku, AWS, HTML, CSS)

[live](#) | [github](#)

A pixel-perfect clone of the text and image/gif sharing social media application, Twitter

- Created a privacy-oriented environment for users by hashing passwords and using CSRF fetch requests paired with authorized user routes to ensure only sanctioned user activity on the application
- Implemented a GIPHY search component by crafting an API fetch request route to return gifs meeting a user's query to add gif attachments on tweet and comment creation
- Increased functionality by utilizing the PicMo library to create a pop-up emoji picker for users to add emojis to their tweets

WorldBnb (JavaScript, React, Redux, Node.js, Express.js, Sequelize, SQLite3, Heroku, AWS, HTML, CSS)

[live](#) | [github](#)

A pixel-perfect clone of Airbnb, a home share/rental application

- Streamlined back-to-front interfaces by designing a backend database schema with subsequent models and migrations with Sequelize and RESTful routes with validations using Express.js to build a structurally sound backend for the frontend
- Generated dynamic React / Redux components to support CRUD features as well as developing user login and spot creation forms, location photo galleries, and location reviews while using AWS for image storing and file uploading
- Styled the application with CSS in keeping with Airbnb's branding to generate individual location cards with dynamic preview galleries on the home page and various modal forms for sign up, log in, create a spot or review functions, all while maintaining a mobile-responsive design

Instapix (Python, SQLAlchemy, Alembic, PostgreSQL, React, Redux, HTML, CSS, Docker)

[live](#) | [github](#)

A photo-sharing social media application inspired by Instagram

- Produced a cohesive PostgreSQL database by assembling a relational database with proper interconnected models to organize data sent to the front
- Constructed a comprehensive deployment system by employing a dockerfile and .yml for minimal developer interaction
- Improved efficiency by designing reusable React components such as forms, user profiles, and media post content
- Cultivated team-building skills by working with a group of five developers, participating in daily SCRUMS, and collaborating on the users profile section of the project to ensure timely project completion

EXPERIENCE

Marketing Manager & Graphic Designer

CULINAIRE

June 2018 - April 2022

- Maintained and developed custom event venue websites with business information, photos of previous events and contact forms using HTML, CSS (Bootstrap), and Jotform to generate leads and promote online presence
- Monitored and updated online presence for over thirty property accounts including websites, Google My Business, Yelp, Open Table, Single Platform, The Wedding Pro, etc.
- Designed web (email blasts, social media graphics, website design) and print materials (collateral, menus, banners, signage)

Graphic Designer

Integrated Real Estate Group

June 2017 - June 2018

- Designed internal corporate collateral, various magazine print ads, direct mailers, event flyers, Constant Contact email blasts, Facebook paid ads, GIFs, videos, and website content
- Created concepts for advertisements including copywriting, selecting images, and overall creative design

EDUCATION

Full Stack Software Engineering - App Academy | 2021- 2022

BFA Studio Arts - Southern Methodist University | 2013 - 2017
